# MAD ASSISTANT APP

Naren Sairam
106118062
CSE - 'B'

Description:

This application provides a complete guide for learning android application development. Enables users to learn more about different UI elements and will help them develop their own android apps. The app provides a list of basic/advanced level components with demo and working source code.

The app also has an app development quiz where students can test their knowledge. The questions can be dynamically added from Firebase.
